Product Description

The inspiration to develop the Brockenhurst suite was triggered by asking one simple question:

How can you combine an award winning LED flame-effect technology with a stunning display that compliments the modern home?

The answer was to design a marble-effect suite that is sleek, solid, and timeless. Which has thoughtfully been obsessed over every detail in order to arrive at a convincing marble effect design, one that can serve as a centre piece of any home.

- Easy to install MDF Solid Suite
- 3-pin plug with 1.8m long cord
- All fuel bed items included
- Remote control included

SEAMLESS JOINTS

A suite made of the latest in MDF technology is the only way to dress the Brockenhurst fire. Light in weight and strong in both, appearance and durability, the chamferededge design is a detail we added to bring a touch of charm to any room. The MDF construction methods are cofriendly and the materials that are used are sustainable.

HAND-PAINTED

The marbling effect you see on each suite is crafted using a meticulous hand painting technique. The craftsman immerses the MDF through a controlled process that creates a vibrant and decorative marble effect to the MDF surface. There really is no substitute for quality.

FOREST VIEW

The signature logs that are crafted from the rural New Forest in Hampshire sit comfortably on an underlay of wood chippings and husk which delivers a real earthy feel.

DELUXE REAL LOGS

Upgrade your view and create the ultimate experience with our new Deluxe Real Logs. Each Deluxe Real Log is unique and artisanly crafted using actual logs found in nature. They really enhance an already prominent statement piece in any room.

DIAMOND LIGHT

A dynamic way to show how light can enhance the visual aspect of a flame effect – this is something magical. The fuel bed colour changes takes you through a journey of tranquillity. Alternatively, you can choose between the orange, pink, or blue

light setting to create a certain mood.
