

British Fires New Forest 650sq

British Fires

RRP from £1599 (Showroom Exclusive)

Product Description

The New Forest 650sq electric fire adds a new dimension to the family of inset fires. The perfect-square design takes a traditional concept and incorporates our award-winning LED flame visuals to create a contemporary focal point. Equipped with our highly regarded

signature logs you also have the choice of upgrading to Deluxe Real Logs. No matter your choice the 650sq will be a great addition to any room.

The signature logs are crafted from high quality materials that perfectly form together and capture every detail you would expect to see in a log, found whilst walking in the New Forest.

DELUXE REAL LOG

Upgrade your view and create the ultimate experience with Deluxe Real Logs. Each

Deluxe Real Log is unique and artisanly crafted using actual logs found in nature. They really enhance an already prominent statement piece in any room and will take any viewer by surprise – especially, when you tell them that they are real logs!

The development process of the Deluxe Real Logs fuel bed begins by selecting different sized logs, branches, and twigs to create a natural log layout. Then placed on a forest floor bed comprised of bark, twigs, and log remnants. A resin mix is then added into the base and cured in an oven to permanently fix the logs.

FOREST VIEW

The signature logs that are crafted from the rural New Forest in Hampshire, sit comfortably on an underlay of wood chippings and husk, which delivers a real earthy feel.

SLATE EFFECT

A touch of the added slate effect to the logs brings a neat and tidy fuel bed to life.

DIAMOND LIGHT

A dynamic way to show how light can enhance the visual aspect of a flame effect. This is something magical. The fuel bed colour changes take you through a journey of tranquillity.

Specifications

- ☑ Heat output: 1500 W
- ☑ Supply voltage: 220–240 V AC
- ☑ Rating power: 50 Hz
- ☑ Fuse rating: 13 Amp
- ☑ Lighting: LED
