Product Description

Taking aspects of a traditional fireplace and combining with one of four beautiful finishes, the Danville is a look to suit any interior scheme. The brass effect finish combines the incredible and contemporary effects with the classic looks you'd expect from a real fireplace.

This fire can operate via a remote control and can even be used independently of the fully concealed 2kW heater, meaning you can enjoy the classic feel of the fire all year round.

The thermostatic controls mean you can set your fire to produce heat when the room drops to a certain temperature, helping to maintain comfort in your home. With the traditional aesthetics and easy installation, the inset provides visual appeal in any interior space.

The Dimplex Opti-myst range is state-of-the-art, using established ultrasonic technology to create an ultra-fine water mist that rises up and works with the under fuel bed lighting to give a fully three dimensional fire effect. The result is so authentic that it is regularly mistaken for true flames and smoke.

Product Specification
