Product Description

Fortrose

The Fortrose is a the ideal combination of strong tradition and contemporary ease.

Complete with fully variable flame and smoke intensity controls, this cast iron effect stove utilises patented Optimyst technology for the world's most realistic electric flame effect.

Optimyst uses ultrasonic technology to create a unique flame effect, with an ultra-fine water mist that mimics flame and smoke. As the mist rises through the logs, warm light is emitted which reflects against the water, creating an the 3D illusion of flames and smoke which is commonly mistaken for the real thing.

This fire can operate via a remote control and can even be used independently of the fully concealed 2kW heater, meaning you can enjoy the classic feel of the fire all year round.

The thermostatic controls mean you can set your fire to produce heat when the room drops to a certain temperature, helping to maintain comfort in your home. The cast iron style is a traditional classic, fitting in with any interior.

Freestanding Optimyst Electric Stove

- ☐ Unique Optimyst flame effect
- ☐ 2kW heat output
- ☐ Choice of two heat settings
- ☐ Flame effect only setting
- ☐ Remote control
- ☐ Thermostat
