Product Description

The Ignite is a modern and stylish electric fire featuring edge to edge glass to give a seamless finish. With its slim design, it makes the prefect choice for building into a wall to create a modern centrepiece or media wall in your home.
The Ignite includes an easy to use remote control, all of the features can be operated from the remote or the manually controlled digital display on the fire.
With the unique Dimplex Optiflame LED flame technology select from one of six colour themes or cycle through the variety of colours giving you flexibility to choose a theme to suit your home, you can also adjust the flame brightness and the acrylic ice fuel bed offers a contemporary look.
Set the desired temperature for your room with the thermostat control, and with a choice of pre- set times the heat boost function can be activated to warm up a cool room or the runback timer to automatically turn off your fire.
Comfort Saver technology automatically adjusts the fan speed and temperature to precisely match the requirements of the room based on the thermostat setting. If the temperature in the room rises significantly, i.e. sun coming through a window or central heating turns on, the heater will turn off and periodically turn back on to circulate the air around the unit, until the room temperature drops and requires the heater to be constantly on again.
