Product Description

The Penngrove chrome is a stylish inset fire which features the innovative Optimyst smoke and flame effect, a coal styled fuel bed, and controls hidden beneath its canopy; all combined to create one of the most realistic electric inset fires available.

This fire can be operated via a remote control and can even be used independently of the fully concealed 2kW heater, meaning you can enjoy the classic feel of the fire all year round.

The thermostatic controls allow you to set your fire to produce heat when the room drops to a certain temperature, helping to maintain comfort in your home. With the traditional aesthetics and easy installation, this fire provides visual appeal in any interior space.

The Dimplex Optimyst range is state-of-the-art, using established ultrasonic technology to create an ultra-fine water mist that rises up and works with the under fuel bed lighting to give a fully three dimensional fire effect. The result is so authentic that it is regularly mistaken for true flames and smoke.

Optional Spacer Kit available
