

Gazco eReflex New Generation 150RW

Gazco

RRP £1675 (Contact us for our discounted price)

Product Description

The contemporary Gazco eReflex 150RW is a new generation designer electric fire that delivers much more than a fireside glow. Equipped with Gazco's state-of-the-art Chromalight® technology at your fingertips, and a choice of highly-realistic oak log effect or crystal ice effect, this spectacular electric fire elevates the level of ambience to all new levels. Using the innovative app or Thermostatic Eco Remote Control, you'll not only be able to turn on or off the heat independently of the display, but have full control over the array of immersive lighting options available, all from the comfort of your sofa.

Designed to be the perfect centrepiece to sit front and centre as part of a media wall, the eReflex 150RW is easily configurable as a single-sided or multi-sided electric fire. To further enhance your space, an optional mood lighting kit is available which can be placed around your TV or shelves, to bathe them in your choice of 13 vibrant colours, or the steadily changing spectrum mode.
